

Happy New Year to you all

Hope you all are anchored down with these blows we have had. Please consider that aids to navs and other anchored items might be out of place, also lights might be damaged and sunk vessels etc -so be careful out there. The NOTSHIPS have been busy with reports of such as listed below(only some of them are listed here so check your area)

Find attached the latest Notmar, and Coastal Watch letter.

Not much this month otherwise :

-Canadian Tides and Current Tables Juan de Fuca and Georgia Strait available for \$20

-Electronic Nav Charts: Desolation Sound and Malispina Inlet available

-Lots of Lights, Buoys and Sound signals changes

- only one I picked out chart 3540 Campbell River north

-Most others around SaltSpring if you are going that way check them out
